| <b>Subject:</b>     | Smarty include path error  |                     |        |
| <b>Description:</b> | <p>The Smarty include path is hard-coded into include/smarty.php in a distribution-specific nature.</p> <p><code>/usr/local/lib/php/Smarty/Smarty.class.php</code><br/>is specific to RH/FC/CentOS. On my OpenSuSE 10.2 box, it's<br/><code>/usr/share/php5/Smarty/Smarty.class.php</code>.</p> <p>As long as the Smarty/ directory is within <code>PHP_INCLUDE_PATH</code>, the <code>require()</code> statement should just be:<br/><code>require('Smarty/Smarty.class.php');</code></p> |                     |        |
